DETAILED ACTION

This office action is a response to the appeal brief filed on 4/12/2010.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claimed invention such as a process of supplying an outward force in a first direction to enlarge an opening defined by the clamp and supplying a clamping force in a second direction generally transverses to the first direction to disengage the inner portion of the clamp. The closest reference of Ng teaches a process of installing a clamp with a mounting tool into a slot of a motor hub. The inner portion of the clamp with a mount tool of Ng is only deflected (as a first direction, Y-direction) by a deflected portion to enlarge an opening of the clamp follow by lowering the clamp onto the motor hub. Then, the deflected portion of the mounting tool is removed from the clamp to install the clamp into the slot of the motor hub. Since the inner portion of the clamp is only forced to deflect to enlarge the opening of the clamp, the clamping force with the second direction such as X-direction is not required to disengage the inner portion of the clamp. If the second direction such as the X-direction is applied to the clamp of the Ng reference, the clamp should be squeezed and the shape of the clamp should be changed. As soon as the deflected portion of the mounting tool is removed from the clamp, the deflected clamp is got beck to its original shape and fit into the slot of the motor hub. Therefore, it would not be obvious to modify

Art Unit: 3729

Ng by applying any force to disengage the inner portion of the clamp, since doing so would destroy the structure of the clamp of Ng.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
